Title: Progress of the Rolling Cross Sections

Technical Report Number: nes010135

Date: February 5, 1985

Dataset(s): 1984 Continuous Monitoring

Abstract

This technical report details the total number of interviews and response rates, by sample week, for the 1984 Rolling Cross Section surveys. The report also compares basic demographic variables across the Rolling Cross Section surveys, the 1982 CATI survey, and the U.S. Census population estimates for 1982.
