

What's Now and What's Next:
The Affect Misattribution Procedure in the
American National Election Studies

Keith Payne
University of North Carolina
Chapel Hill

APSA 2009

Deliberative voters?

- Subliminally presented words elicit rude behavior
(Bargh, Chen & Burrows, 1996)
- Arbitrary location of voting precinct influenced voting
(Berger, Meredith & Wheeler, 2008)
- Implicit measures assess unintentional (i.e., automatic) reactions

Questions addressed by implicit tests

- Deliberative versus automatic bases for decisions?
- Has racial prejudice faded?

Reaction time priming (Fazio et al., 1986)

- Simple to complete
- Simple to interpret
- Low reliability
- Long procedure

Implicit Association Test (Greenwald et al., 1998)

Obama or pleasant

McCain or unpleasant

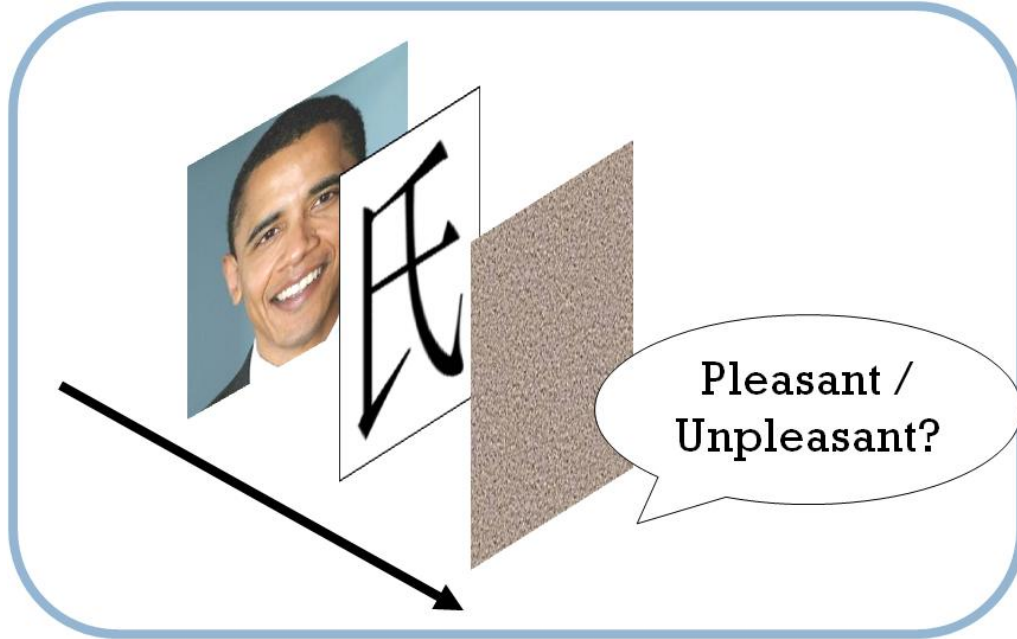

Wonderful

- Good reliability
- Large effects
- Difficult to complete
- Controversial to interpret

Affect Misattribution Procedure (AMP)

- Simple to complete
- Simple to interpret
- High reliability
- Large effects

Payne, Cheng, Govorun, & Stewart (2005).

Candidate evaluations in 2008 Panel Study

- Explicit-Implicit $r = .53^{***}$
- Explicit-Vote Preference $r = .62^{***}$
- Implicit-Vote preference $r = .65^{***}$

	Regression coefficient predicting Voting Preference
Explicit	1.19***
Implicit	2.10***

Candidate evaluations in 2008 Panel Study

- Explicit-Implicit $r = .53^{***}$
- Explicit-Vote Preference $r = .62^{***}$
- Implicit-Vote preference $r = .65^{***}$

	Regression coefficient predicting Voting Preference
Explicit	1.19***
Implicit	2.10***
Time 1 Certainty	-.18*
Certainty X Explicit	.83***
Certainty X Implicit	.08

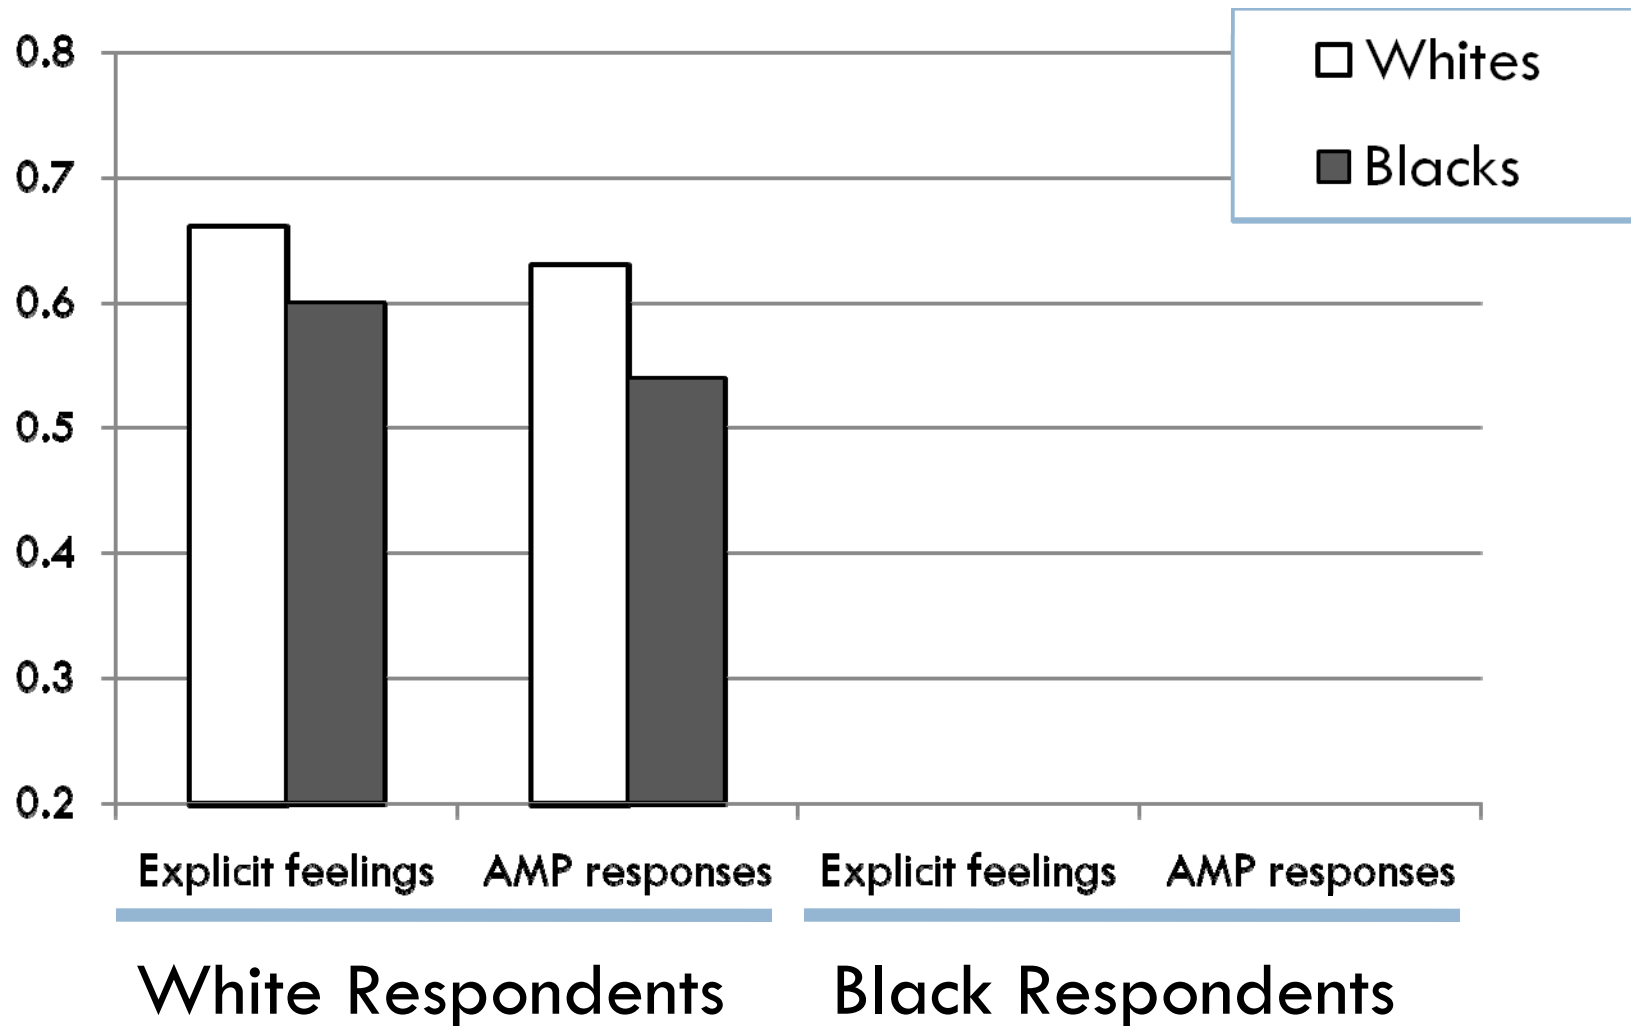

Time Series: Explicit and implicit race attitudes

Time Series: Explicit and implicit race attitudes

Panel: Explicit and implicit race attitudes

Panel: Explicit and implicit race attitudes

Does implicit prejudice predict voting for Obama, McCain?

Explicit prejudice in the Panel Study

- Feelings toward Blacks
- Sympathy for Blacks
- Admiration for Blacks
- Too much influence

Explicit prejudice in the Time Series

- Feelings toward Blacks
- Symbolic Racism
- Stereotypes of IQ and work ethic

Possible Effects of Prejudice

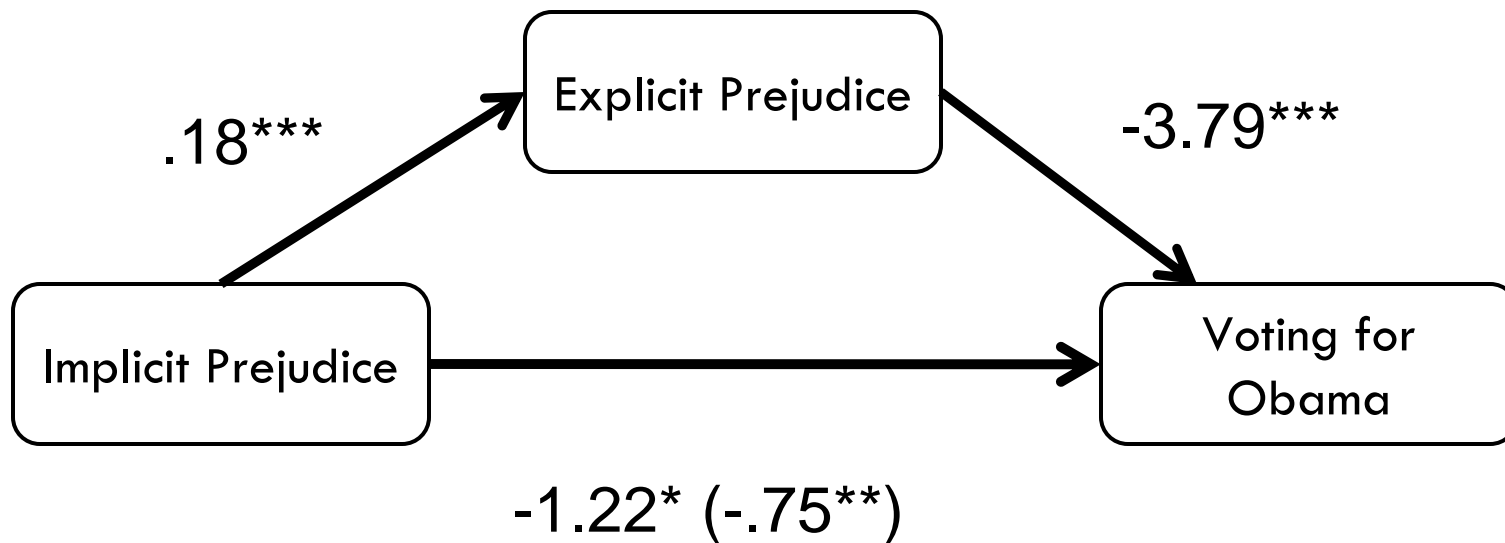

- Obama voter → McCain voter
- Obama voter → Non-voter
- Non-voter → McCain voter

- Two routes by which implicit attitudes affect decision
 - ▣ Directly, independent of explicit
 - ▣ Indirectly, serving as input for deliberation

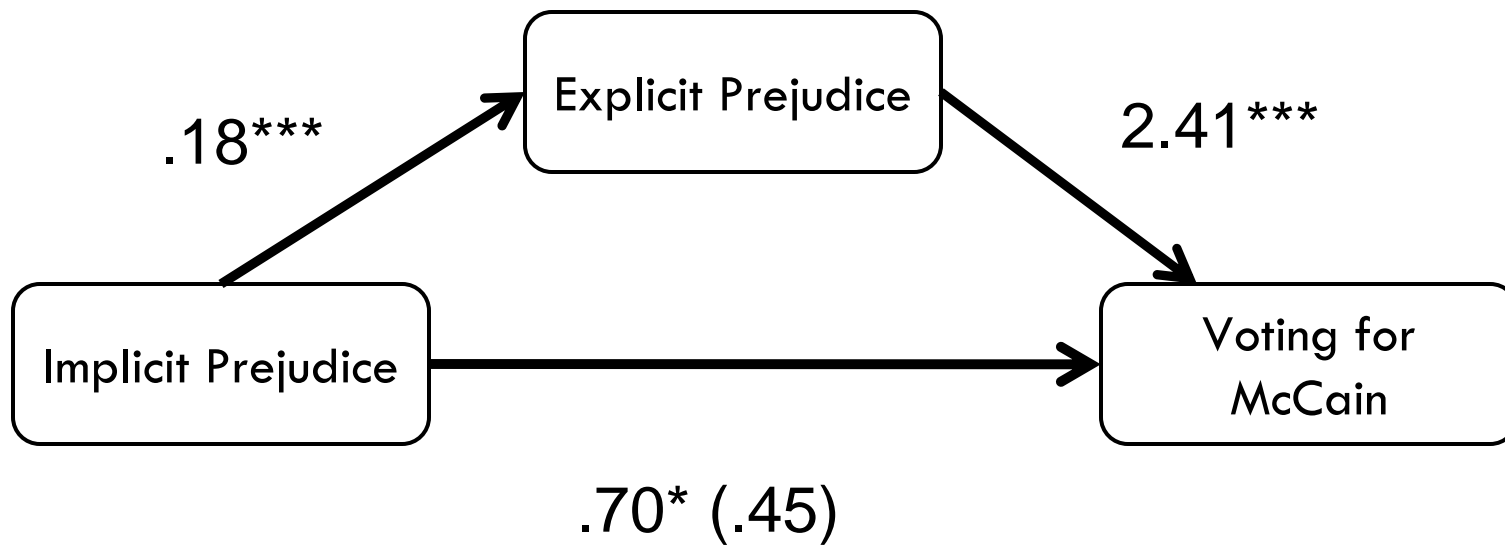

Time Series: Predicting McCain votes

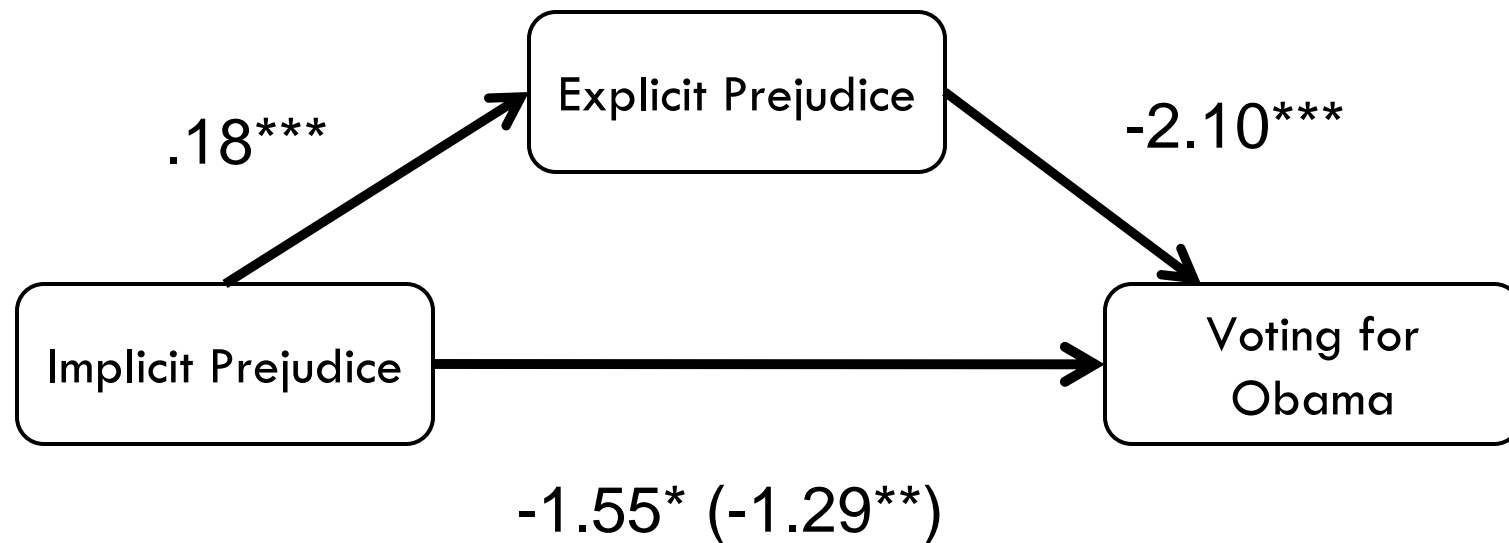

Time Series: Predicting Obama votes

Panel: Predicting McCain votes

Panel: Predicting Obama votes

Many more questions...

- AMP responses available at ANES
- ANES has tracked changes in certain attitudes since 1948; how will implicit attitudes change?
