POST-ELECTION ADMINISTRATIVE

Number of days since election: Post-election IW beginning date

VALID CODES:
------------
Range: 1-56

MISSING CODES:
-------------
-4. NA (missing)
-2. No Post-election IW

NOTES:
-----
The 2008 national elections were held on November 4, 2008.
V084003b    PostAdmin.3b. No. days since electn: Post-electn IW end date

POST-ELECTION ADMINISTRATIVE

Number of days since election: Post-election IW ending date

VALID CODES:

Range: 1-56

MISSING CODES:

-4. NA (missing)
-2. No Post-election IW

NOTES:

The 2008 national elections were held on November 4, 2008.

V084004    PostAdmin.4. Total no. IW sessions: Post-election IW

POST-ELECTION ADMINISTRATIVE

Total number of interview sessions: Post-election IW

VALID CODES:

1. One IW session
2. Two IW sessions
3. Three IW sessions
4. Four IW sessions
5. Five IW sessions

MISSING CODES:

-4. NA (missing)
-2. No Post-election IW

NOTES:
A session is defined as an opening or re-opening of the survey instrument followed by administration of at least 1 survey question. A new session may initiate as the result of Respondent breakoff or technical problems.

TYPE:
---
Numeric

V084005  PostAdmin.5. Total no. interviewers: Post-election IW

POST-ELECTION ADMINISTRATIVE

Total number of interviewers: Post-election IW

VALID CODES:

1. One total Pre-election IWRs
2. Two total Pre-election IWRs
3. Three total Pre-election IWRs
4. Four total Pre-election IWRs

NOTES:
---

This is the total number of interviewers for the case, not the total number for administration of the Post-election survey instrument alone.

TYPE:
---
Numeric

V084006  PostAdmin.6. Version: Post-election IW

POST-ELECTION ADMINISTRATIVE

Version of survey instrument: Post-election

VALID CODES:

70. Version 7.0 - Prepared 10/29/08
71. Version 7.1 - Prepared 11/17/08
72. Version 7.2 - Prepared 11/20/08

MISSING CODES:
---
-2. No Post-election IW

TYPE:
----
Numeric

=============================================================================  
V084007  PostAdmin.7. Total no. calls: Post-election  
=============================================================================  

POST-ELECTION ADMINISTRATIVE

-----------------------------------------------------------------------------
Total number of calls: Post-election  
-----------------------------------------------------------------------------

VALID CODES:
-----------
Range: 2-38

NOTES:
-----
The total number of calls includes some calls by telephone. Count by mode is not available. Calls include all attempts by the interviewer to do any of the following: locate the address; obtain consent; complete the Post-election interview.

TYPE:
----
Numeric

=============================================================================  
V084008  PostAdmin.8. Interviewer IW number: Post-electn IW (nth IW)  
=============================================================================  

POST-ELECTION ADMINISTRATIVE

-----------------------------------------------------------------------------
Interviewer interview number: Post-election IW  
-----------------------------------------------------------------------------

VALID CODES:
-----------
Range:

MISSING CODES:
-------------
-4. NA (missing)
-2. No Post-election IW

NOTES:
-----
This identifies the interview as the Nth Post-election interview conducted by the interviewer.
TYPE: Numeric

---

**V084009** PostAdmin.9. Mode of interview: Post-election IW

POST-ELECTION ADMINISTRATIVE

Mode of interview: Post-election IW

VALID CODES:

1. Face-to-face IW

MISSING CODES:

-2. No Post-election IW

NOTES:

All Pre-election interviews were conducted fact-to-face.

TYPE: Numeric

---

**V084010** PostAdmin.10. Length of interview: Post-election IW

POST-ELECTION ADMINISTRATIVE

Length of interview: Post-election IW

MISSING CODES:

-4. NA (missing)

-2. No Post-election IW

NOTES:

This is a variable with 1 decimal place and represents the summed lengths of interview sessions that were recorded with rounding to whole seconds. The mean length of Pre-election interviews was 89.3 minutes. Interview timing includes any pauses or interruptions during interview sessions.
V084011 PostAdmin.11. Language of interview: Post-election IW
============================================================================= POST-ELECTION ADMINISTRATIVE
Language of interview: Post-election IW
============================================================================= VALID CODES:
1. English
2. Spanish
3. Both English and Spanish
MISSING CODES:
-2. No Post-election IW
NOTES:
This is the language in which the Post-election survey IW was conducted.

V084012a PostAdmin.12a. Interview verification: Post-election IW
============================================================================= POST-ELECTION ADMINISTRATIVE
Verification: Post-election IW
============================================================================= VALID CODES:
0. Not a verified case
1. Verified case
MISSING CODES:
-2. No Post-election IW
NOTES:
Verification of interviews was conducted using review of audio-recorded files.

TYPE:
----
Numeric

V084012b  PostAdmin.12b. Interview evaluation: Post-election IW

POST-ELECTION ADMINISTRATIVE

Evaluation: Post-election IW

MISSING CODES:
-------------
-1. INAP, not applicable to the 2008 Time Series Post-election

NOTES:
-----
In the 2008 Time Series Study, an evaluation process for interviews that was separate from the verification process (PostAdmin.12a) was not conducted.

TYPE:
----
Numeric

V084013  PostAdmin.13. Result (Post-election)

POST-ELECTION ADMINISTRATIVE

Result (Post-election)

MISSING CODES:
-------------
-1. INAP, not available

NOTES:
-----
Post-election result codes are not available.

TYPE:
----
Numeric

POST-ELECTION ADMINISTRATIVE

Interview recorded: Post-election IW

VALID CODES:

1. Yes, interview recorded (consent given)
5. No, not recorded (consent not given)

MISSING CODES:

-2. No Post-election interview

NOTES:

This variable indicates whether the Pre-election interview had segments audio-recorded: for cases with consent given by the Respondent, all open-ended responses were recorded.

TYPE:

Numeric

V084015 PostAdmin.15. Respondent payment amount: Post-election IW

POST-ELECTION ADMINISTRATIVE

Payment amount made: Post-election IW

VALID CODES:

25. $25 payment to respondent
50. $50 payment to respondent

MISSING CODES:

-9. Respondent refused payment
-2. No Post-election interview
-4. Missing

TYPE:

Numeric

V084016 PostAdmin.16. Respondent payment mode: Post-election IW
POST-ELECTION ADMINISTRATIVE

Payment mode: Post-election IW

VALID CODES:

1. All payments were made in cash upon completion of the Post-election IW

MISSING CODES:

-2. No Post-election interview

TYPE:

Numeric

------------------
V084017a  PostAdmin.17a. Refusal made: Post-election IW

POST-ELECTION ADMINISTRATIVE

Refusal made: Post-election IW

VALID CODES:

0. No refusal
1. 1 or more refusals

NOTES:

If 1 or more calls in the Post-election call history was coded for a refusal by anyone at the household, then this variable has been coded 1.

TYPE:

Numeric

------------------
V084017b  PostAdmin.17b. Refusal conversion: Post-election IW

POST-ELECTION ADMINISTRATIVE

Refusal conversion: Post-election IW
MISSING CODES:

-1. INAP, not applicable to the Post-election IW

NOTES:

For the Post-election IW, cases were not specifically flagged as 'refusal conversion' cases. Interview cases with 1 or more calls coded for refusal by a household member are indicated in PostAdmin.17a.

TYPE:

Numeric

POST-ELECTION ADMINISTRATIVE

Respondent incentive: Post-election IW

VALID CODES:

0. No incentive was paid or given to the respondent in addition to the respondent payment as indicated in PostAdmin.16a.

MISSING CODES:

-2. No Post-election IW

TYPE:

Numeric

POST-ELECTION ADMINISTRATIVE

Payment date: Post-election interview

NOTES:

Payment was made when the interview was complete; this variable is the same as PostAdmin.2c (MMDD).
V084020 PostAdmin.20. Persuasion letter: Post-election IW

POST-ELECTION ADMINISTRATIVE

Persuasion letter: Post-election IW

MISSING CODES:

- 1. INAP, not applicable to the Post-election IW

NOTES:

Data for persuasion letters are not available for the 2008 Time Series Post-election IW.

TYPE:

Numeric

V084021a PostAdmin.21a. COMMENT SUMMARY: positive comment

POST-ELECTION ADMINISTRATIVE

POST-ELECTION INTERVIEWER:

V084401  PostRandom.1. Forward or reverse coding
POST-ELECTION RANDOMIZATION

-----------------------------------------------
Forward or reverse order of response options for selected
Post-election questions
-----------------------------------------------

VALID CODES:
-----------
1. Forward order response options
2. Reverse order response options

MISSING CODES:
-------------
-2. No Post-election IW

REFERENCE:
---------
Appendix A2. (Post-election questions with forward/reverse response options)
PreRandom.1. (Pre forward or reverse coding)

NOTES:
-----
For a selected set of Post-electon survey questions,
Respondents were randomly assigned to administration of
all questions in the set using either forward or reverse
order for the response options.
Appendix A2, "ANES 2008 Time Series Study Post-election
questions with forward/reverse response options" provides a
list of all Post-election questions included in the set for
forward/reverse assignment.

.....
For Post-election cases, PostRandom.1. has the same value
as PreRandom.1, which identifies forward/reverse order of
response options for a selection of survey questions from
the Pre-election survey; Respondents having reverse order
selected for the set of Pre-election question also have
reverse order selected for the selection of Post-election
questions.

.....
Reverse order meant that the order of response options
in the question text was reversed, and the order in which
response options were listed onscreen for interviewer coding
was also reversed.

TYPE:
-----
Numeric

=====================================================================================================
V084402  PostRandom.2. VERSION OLD or VERSION NEW subset of questions
=====================================================================================================

POST-ELECTION RANDOMIZATION
Question version: "OLD" or "NEW" version

VALID CODES:

1. OLD version
2. NEW version

MISSING CODES:

-2. No Post-election IW

REFERENCE:

PreRandom.2. (OLD or NEW selection of questions)
Appendix B2. (Post-election questions with split administration)
Appendix B1. (Pre-election questions with split administration)

NOTES:

Assignment to OLD/NEW was made in the Pre-election wave for alternate sets of selected Pre-election questions; OLD/NEW assignment continues for the Post-election wave. All items subject to OLD/NEW assignment have common assignment to either OLD or NEW for both the Pre and Post; for Post-election cases, the value in PostRandom.2 is the same as in PreRandom.2.

The OLD/NEW split was the 'major' split for the ANES 2008 Time Series Study.

Appendix B2, "ANES 2008 Time Series Study Post-election questions with split administration," provides a list of all Post-election questions having split administration. Appendix B1, "ANES 2008 Time Series Study Pre-election questions with split administration," provides a list of all Pre-election questions having split administration.

This describes the value set for Hispanic status prior to Post-election question administration, that is, this describes the value assigned to be the preload value for use during administration of Post survey questions.
No case of preload failure was for a Respondent with preload value Hispanic status.

For cases with preload value set to Hispanic status, each digit in this 4-digit code represents presence (1) or absence (0) of Hispanic identification at one of four possible sources from the Pre-election wave.
Cases had preload value set as Hispanic for the Post-election wave if any of the following from the Pre-election wave indicated Hispanic ethnicity:

1ST DIGIT
Household (HH) listing/roster answer Yes Hispanic (for R)

2ND DIGIT
Code 40 (Hispanic) for any Pre-election race group mention (Y24a-Y24e)

3RD DIGIT
Mention of Hispanic group in open-ended ethnicity response (coded 2 or 3 in Y27)

4TH DIGIT
Code 1 (Yes) at Y28a question whether R has Hispanic descent: only asked of Rs not already coded Hispanic at Y27.

Case 291 was set to 1000 for this preload value however should have been 1100 because an 'Other' code for race in
anes_timeseries_2008_post_vardoc_codebook.txt

pre-election Y24 (race of Respondent) actually included a Hispanic mention that was incorrectly coded by the interviewer to Other (subsequently recoded to 84 in Y24a).

.....
Cases 342,630,1377,1675,1677,2035,2095,2109,2119 were set to 1010 for this preload value but should have been 1110 due to the same error as for case 291 (Y24a or Y24b was subsequently recoded to 84 for these cases).

.....
Case 282 was set to preload value 0001 however the interviewer had erroneously coded the Respondent at Y27 for no Hispanic race or ethnicity mention; an 'Other' coding by the interviewer for race in pre-election Y24 actually did include a Hispanic mention and Y28a need not have been asked. The correct preload value here should have been 0100 (Y24b was subsequently recoded to 84).

.....
Cases 1501,1657,1667 were coded 1001 but should have had a correct preload value 1100 due to the same error indicated for case 282 (Y24a or Y24b was subsequently recoded to 84).

C4x5. (SUMMARY: BALLOT CARD USE FOR INCORRECT DISTRICT)
NOTES:
-----
The summary for party of House vote is C7a3x1
The summary for candidate code of House vote is C7a3x3.

The Ballot Card (described in C7 and C4x5) remained present for the administration of this question (which was administered to Respondents who were registered in the preload county).
Codes 1,3 and 5 correspond to names appearing on the Ballot Card.

An incorrect Ballot Card was selected for 22 cases of incorrect Congressional District preload (codes 8 and 9), as documented in C4x5.
Together with the cases coded 8 and 9 here, there were 2 additional cases coded 5 in C4x5, however in one case the Respondent identified the correct Democratic candidate for his/her actual district (this case is coded 1 in C7a2) and in the remaining case the Respondent had voted for a minor party candidate [coded 7 in C7a2]).

In 3 cases, the preload of candidate names failed and this question was not administered (coded -4).

For the 8 cases coded 6 here, Respondents were also administered C7a3 (which otherwise represents House vote outside preload county). Re-verification of Congressional district for these 8 cases determined that for 3 of the cases the Respondent's volunteered statement was correct: cases 769,1604,1794, which have been coded for candidate code in summary C7a3x3 using codes 70-76.

For the 19 cases coded 91 or 93, R had originally been coded Other (7) by the interviewer and provided a name from another district; although R did vote within the preload county, the cases were reviewed and it was determined that R probably voted in the other district. These cases have been coded for candidate code in summary C7a3x3 using outside-district codes 70-76.

POST-ELECTION SURVEY

Please look at page 3 of the booklet.
I'd like to get your feelings toward some of our political leaders and other people who are in the news these days.
I'll read the name of a person and I'd like you to rate that person using something we call the feeling thermometer.
Ratings between 50 degrees and 100 degrees mean that you feel favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable.
toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person. If we come to a person whose name you don't recognize, you don't need to rate that person. Just tell me and we'll move on to the next one.

V085090a  G3e1. [OLD] Abortion: Democratic House cand placement

POST-ELECTION SURVEY

IF R SELECTED FOR VERSION OLD:
IF DEMOCRATIC CANDIDATE IN HOUSE RACE:
IF R DID NOT INDICATE NO RECOGNITION OF DEMOCRATIC HOUSE CAND IN THERMOMETER:

(Looking at page 6 of the booklet)
Where would you place -Democratic House candidate-?
on abortion?

INTERVIEWER INSTRUCTION:
-----------------------
{DO NOT PROBE DK}

VALID CODES:
-------------
1. By law, abortion should never be permitted.
2. The law should permit abortion only in case of rape, incest, or when the woman's life is in danger.
3. The law should permit abortion for reasons other than rape, incest, or danger to the woman's life, but only after the need for the abortion has been clearly established.
4. By law, a woman should always be able to obtain an abortion as a matter of personal choice.
7. Other {SPECIFY} {VOL}

MISSING CODES:
--------------
-1. INAP, nonrecognition in thermometer; R selected for version NEW; no Democratic House candidate
-2. No Post-election IW
-4. NA, preload failure
-5. Incorrect Congressional district preloaded (99 in Sample.2b)
-8. Don't know
-9. Refused

V085132   K1a. Black respondent (preload)

POST-ELECTION SURVEY

BLACK RESPONDENT (PRELOAD)

VALID CODES:

00. Black not indicated in Household Listing and code 10 not coded in Y24a-e
01. Code 10 in Y24a-Y24e codes
10. Black indicated in household listing (HHList.2)
11. Black indicated in household listing (HHList.2) and Code 10 in Y24a-Y24e

MISSING CODES:

-2. No Post-election IW
-5. Preload value not Black, but Y24a-e race Black mentioned

REFERENCE:

Pre: Y24a. - Y24e. (Race of Respondent)
HHList.2. (Respondent: race)

NOTES:
-----
This is the value set prior to administration of the
Post-election interview.

Each digit in the 2-digit value of K1a represents the
presence (1) or absence (0) of Black identification at one
of two possible sources from the Pre-election wave.
Cases were preloaded as Black for the Post-election wave
if either of the following from the Pre-election wave indicated
identification as Black:
1ST DIGIT
Household Listing (roster) answer Yes Black [code 2] (for R)
2ND DIGIT
Code 10 (Black) for any Pre-election race group mention
Code 10 in Y24a-Y24e represented the coding of 'Black' by the interviewer. Cases 278, 464, 476, 478, 566, 652, 1015, 1038, 1135, 1139, 1146, 1148, 2264 were set to 10 for this preload value however should have been 11 because an 'Other' code for race in pre-election Y24 (race of Respondent) actually included a Black mention that was incorrectly coded by the interviewer to Other (subsequently recoded to 81).

In 2 cases (523, 2300) the preload value was set to 00 however should have been coded 01 because an 'Other' code for race in pre-election Y24 (race of Respondent) actually included a Black mention that was incorrectly coded by the interviewer to Other (subsequently recoded to 81).

2 cases of preload failure were for Respondents identified as black in K1a_.

TYPE:
----
Numeric

V085133  K1a. BLACKS Rs: life be affected by what happens to blacks

POST-ELECTION SURVEY

IF PRELOAD BLACK:

Do you think that what happens to BLACK PEOPLE in this country will have something to do with what happens in your life?

VALID CODES:
-------------
1. Yes
5. No
7. Depends {SPECIFY}

MISSING CODES:
-------------
-1. INAP, not preloaded as Black and no preload failure
-2. No Post-election IW
-4. NA, preload failure (3 cases)
-8. Don't know
-9. Refused

NOTES:
-----
2 cases of preload failure were for Respondents identified as black in K1a_.
POST-ELECTION SURVEY

IF PRELOAD BLACK:
IF WHAT HAPPENS TO BLACK PEOPLE WILL AFFECT WHAT HAPPENS IN R'S LIFE:

How much will it affect you? A LOT, SOME, or NOT VERY MUCH AT ALL?

VALID CODES:

1. A lot
3. Some
5. Not very much at all

MISSING CODES:

1. INAP, 5,7,4,8,9 in K1a; not preloaded as Black and no preload failure
2. No Post-election IW
4. NA: preload failure (3 cases)
8. Don't know
9. Refused

REFERENCE:

PostRandom.1. (Post forward or reverse coding)

NOTES:

2 cases of preload failure were for Respondents identified as black in K1a.

This question was included in the selection of Post-election questions for which Respondents were randomly assigned to response options in either forward or reverse order, as documented in PostRandom.1.
HISPANIC RESPONDENT (PRELOAD)

VALID CODES:

0. Not preloaded as Hispanic
1. Preloaded as Hispanic

MISSING CODES:

-2. No Post-election IW
-91. Preload value Not Hispanic in error: Hispanic in HH listing, Y24a-e or Y25a-d (-0010 in B2_)
-99. Preload value Hispanic in error: not Hispanic in HH listing, Y24a-e or Y25a-d (-9999 in B2_)

REFERENCE:

B2_. (HISPANIC (PRELOAD)

NOTES:

Built from B2_.

This is the value set prior to administration, for use as preload.

Cases were preloaded as Hispanic for the Post-election wave if Hispanic was indicated in the Household Listing or roster (HHList.3), or if Pre-election Y24a-Y24e race group codes included code 50 or if the interviewer indicated Hispanic mention in Pre-election ethnicity item Y27, or if ethnicity was indicated in the Pre-election Hispanic followup to Y27, Y28a.

Code 50 in Y24a-Y24e represented the coding of 'Hispanic' by the interviewer; recoding of 'Other' mentions to Hispanic code 85 followed completion of the Post-election field period.

No case of preload failure was for a Respondent identified as Hispanic here.

TYPE:

Numeric

V085135   K1b. HISPANIC Rs: life affected by what happens to Hispanics
Do you think that what happens to HISPANIC-AMERICANS in this country will have something to do with what happens in your life?

VALID CODES:

1. Yes
5. No
7. Depends {SPECIFY}

MISSING CODES:

-91. Preload value Not Hispanic in error: Hispanic in HH listing, Y24a-e or Y25a-d (-91 in K1b_)
-99. Preload value Hispanic in error: not Hispanic in HH listing, Y24a-e or Y25a-d (-99 in K1b_)
-1. INAP, not preloaded Hispanic and no preload failure
-4. NA, preload failure (3 cases)
-2. No Post-election IW
-8. Don't know
-9. Refused

NOTES:

Cases coded -99 in K1b_ should not have been administered K1b-K1b1; data for these cases have been removed from K1b and K1b1 (to code -99).

The 3 cases coded -91 in K1b_ should have been administered K1b-K1b1.

No cases with preload failure were identified as Hispanic in K1b_.

Q1. INTRO STEREOTYPE HARDWORKING

POST-ELECTION SURVEY

Please turn to page 8 of the booklet.
Now I have some questions about different groups in our society.
I'm going to show you a seven-point scale on which the characteristics of the people in a group can be rated. In the first statement a score of ‘1’ means that you think almost all of the people in that group tend to be "hard-working." A score of ‘7’ means that you think most people in the group are "lazy."
A score of ‘4’ means that you think that most people in the group are not closer to one end or the other, and of course, you may choose any number in between.

V085174a  Q1a. Stereotype: Whites hardworking

POST-ELECTION SURVEY

V085187b    Q9a2. CSES: Like-dislike: Republican Party
=============================================================================

POST-ELECTION SURVEY - CSES MODULE

(I'd like to know what you think about our political parties. After I read the name of a political party, please rate it on a scale from 0 to 10, where 0 means you strongly dislike that party and 10 means that you strongly like that party.
If I come to a party you haven't heard of or you feel you do not know enough about, just say so.)
Using the same scale, where would you place the REPUBLICAN PARTY?
=============================================================================
And what do you think of the presidential candidates? After I read the name of a presidential candidate, please rate them on a scale from 0 to 10, where 0 means you strongly dislike that candidate and 10 means that you strongly like that candidate. If I come to a presidential candidate you haven’t heard of or you feel you do not know enough about, just say so. The first is JOHN MCCAIN.

INTERVIEWER INSTRUCTION:

V085247 T5. BM1: Why does R think Obama won Presidential electn

POST-ELECTION SURVEY - BM1 MODULE

IF R SELECTED FOR VERSION 2A:

WHY do you think Barack Obama won the Presidential election?

MISSING CODES:

-3. Restricted text: not yet coded

NOTES:

Module T1a-T6 comprises the 1st Bonus Minutes module.

For the ANES 2008 Time Series Study, master codes and coding procedures for open-ended questions are being revised; data coded according to new master codes will be available in a future release.
Redacted texts of actual 2008 Time Series open-ended responses are available in a separate release file.

Respondents were randomly assigned to be asked VERSION 1
nominee/winner affects questions T1-T1f1 or else VERSION 2
nominee/winner affects questions T4-T4f1.
In addition, VERSION 1 Respondents were randomly assigned
to be asked either the T2 (VERSION 1A) or T3 (VERSION 1B)
nomination result question, and VERSION 2 Respondents were
randomly assigned to be asked either the T5 (VERSION 2A)
or T6 (VERSION 2B) election result question.
Due to a programming error, however, T5 was asked only
of VERSION 2A respondents who had not replied Yes (1) in
T4f, and T6 was asked only of VERSION 2B respondents
who had not replied Yes (1) in T4f.

REFERENCE:
---------
B2_. (HISPANIC PRELOAD)

NOTES:
-----
Module W1_-W16 comprises the 3rd Bonus Minutes module.

Built from B2_. This is the same as K1b_.

This is the value set prior to administration, for use as preload.

Cases were preloaded as Hispanic for the Post-election wave if Hispanic was indicated in the Household Listing or roster (HHList.3), or if Pre-election Y24a-Y24e race group codes included code 50 or if the interviewer indicated Hispanic mention in Pre-election ethnicity item Y27, or if ethnicity was indicated in the Pre-election Hispanic followup to Y27, Y28a.

Code 50 in Y24a-Y24e represented the coding of 'Hispanic' by the interviewer; recoding of 'Other' mentions to Hispanic code 85 followed completion of the Post-election field period.

No case of preload failure was for a Respondent identified as
Hispanic here.

NOTES:
-----
Module W1_-W16 comprises the 3rd Bonus Minutes module.

This is the value set prior to administration, for use as preload.

This was the country of Hispanic ancestry in the Pre-election interview for Respondents who had identified as Hispanic code 40 in Pre-election Y24a-Y24e, or who had been coded as Hispanic by the interviewer in Pre-election Y27, or who had been coded for Hispanic descent in Y28a.

Some respondents who were identified as Hispanic for the Pre-election preload were not asked the Pre-election question on country of Hispanic ancestry, however, because country of ancestry was asked only if Y24a-Y24e/Y27/Y28 correctly captured Hispanic status; in cases of interviewer error Hispanic status was not correctly captured.

V085311  AMP.1. 1st BLACK FACE PHOTO: response (P or Q)

POST-ELECTION SURVEY - AMP MODULE

1st DISPLAY OF BLACK FACE: response (P or Q)

VALID CODES:
----------
0. Coded 'Q' ('Unpleasant')
1. Coded 'P' ('Pleasant')

MISSING CODES:
---------------
-2. No Post-election IW
-4. Not administered due to programming error (randomly selected as the 1st photograph/pictograph pair)
-5. INAP, not completed by respondent

NOTES:
-----
The Module for the AMP (the Affect Misattribution Procedure, a means for measuring implicit attitudes) was the last module of the Post-election interview and was self-administered by the Respondent.
The AMP was proposed to the ANES by Keith Payne of the University of North Carolina; a link to a presentation and audio file offering more information about the AMP and its potential relevance to ANES users is found in the ANES 2008 Time Series User Guide.

The AMP module comprised laptop displays of 48 pairings of photograph (face) and pictograph (Chinese character), in each of which the photograph display was barely perceptible but the pictograph display that followed was clearly visible. Following the display of each pair, the Respondent coded a rating of 'Pleasant' (keystroke: 'P') or 'Unpleasant' (keystroke: 'Q').
The photographs represented faces of young men, 12 faces of young white males and 12 faces of young black males, where each of the faces was administered twice, for a total of 24 displays of black faces and 24 displays of white faces. An algorithm randomized the order of face displays and the order of pictograph displays (pictographs were displayed only once each).

Each of the 24 photographs was identified by an associated photo 'letter'; images of the photographs themselves with the associated letter of each ['A','B','C', etc.] is found in the User Guide).

The displays of photo-pictograph pairs are represented in the 2008 Time Series Study release data by sets of variables organized according to the 1st-24th displays of black faces [sets AMP.1-AMP.24] and the 1st-24th displays of white faces [sets AMP.25-AMP.48].

The set of variables representing each display provides the Respondent's rating ['P' or 'Q'], the photograph 'letter', the Respondent's response time, and the iteration number (as the nth display of the 48 displays overall).

PROGRAMMING ERROR NOTE:
As the result of a technical glitch, the 1st photo/pictograph pair, although properly selected by the programming algorithm, was not actually displayed to the Respondent.

For the set of variables representing the 1st black face (set AMP.1) and the set of variables representing the 1st white face (set AMP.25), cases are coded -4 when the selection of the photograph/pictograph pair had represented the 1st iteration in the AMP series.

LANGUAGE NOTE:
The AMP module was not translated into Spanish.

See AMP.50 for Respondents unable to complete the AMP module due to visual limitations.

The 48 iterations in the AMP module were preceded by 4 "test" administrations of response to Chinese characters alone; data for these test administrations are not available.
