(screener).

Before an interview could be conducted, the screener was completed by an adult household member (called 'the informant'), who listed all adult (17 years old or older) household members. The informant also provided age, race, gender, Latino status, citizenship status, and relationship to the informant for each listed member.

The random selection of Respondent was made among the screener's eligible household members (citizens age 18 or older by October 30, 2008).

Race categories in HHList.2 are the categories that were available to the interviewer for coding the informant's description of each household member.

.

Only when the informant is also the selected Respondent will HHList.2 represent a Respondent's self-identification of race.

Y24a-Y24e in the demographic section of the Pre-election interview asks the survey Respondent for his/her racial group(s) according to a different coding scheme. For Respondents having black identification at either HHList.2 [code 2] or Y24a-Y24e (demographic section racial group mentions), a summary comparison of screener race and demographic race is provided in Post-election item J9a. Post-election item J9a codes Respondents who were flagged in the Post-election preload as black Respondents for Post-election questions Kla-Klal (which were administered to black Respondents only).

.

Respondent's race as identified in HHList.2 was used in the construction of both pairs of post-stratified weights, WT.1 and WT.2 (centered at mean 1.0), and WT.1a and WT.2a (not centered).

NOTES:

This represents information given in the household listing

Before an interview could be conducted, the screener was completed by an adult household member (called 'the informant'), who listed all adult (17 years old or older) household members. The informant also provided age, race, gender, Latino status, citizenship status, and relationship to the informant for each listed member.

The random selection of Respondent was made among the screener's eligible household members (citizens age 18 or older by October 30, 2008).

Categories in HHList.3 are the categories that were available to the interviewer for coding the informant's description of each household member.

. . . .

Only when the informant is also the selected Respondent will HHList.3 represent a Respondent's self-identification of Latino status.

Respondents having Hispanic identification at either HHList.3 [code 1] or in Pre demographic-section items Y24a-Y24e/Y27/Y28a were flagged in the Post preload (B2_) as Hispanic Respondents for Post-election questions B2a-B2b, Klb-Klb1 (which were administered to Hispanic Respondents only).

Relevant Pre demographic items are:

Y24a-Y24e. R identifies his/her racial group(s) [coded]

Y25. R identifies his/her ethnicity [open]

Y27. IWR checkpoint, any Hispanic ethnic mention

Y28a. R answers whether he/she has Hispanic background;

asked only if Y27 is coded No.

. . . .

Respondent's Latino status as identified in HHList.3 was used in the construction of both pairs of post-stratified weights, WT.1 and WT.2 (centered at mean 1.0), and WT.1a and WT.2a (not centered).

NOTES:

Built from all adult screener information.

Codes represent traditional ANES household composition categories and describe the adult composition of the household (including both eligible and noneligible adults).

Married couple status in codes for HHList.10 also includes domestic partners, however, for continuity over the time-

series and due to the difficulty of consistently identifying same-sex relationships, married couple status in codes 30-55 does not reflect same-sex partners. Married couple codes were used whenever a married couple was documented as present in the household. In 1 case (1483), an adult household member with relationship (to informant) refused was counted as a non-relative. TYPE: ____ Numeric ______ V081111a HHList.11a. PRE-ELECTION RANDOMIZATION

PreRandom.1. Forward or reverse coding

V082401

Forward or reverse order of response options for selected Pre-election questions

VALID CODES:

- Forward order response options for selected questions (see Appendix A1)
- Reverse order response options for selected questions (see Appendix A1)

REFERENCE:

Appendix A1. (Pre-election questions with forward/reverse response options)
Appendix A2. (Post-election questions with forward/reverse response options)
Post: PostRandom.1. (Post response option order)

NOTES:

For a selected set of Pre-electon survey questions, Respondents were randomly assigned to administration of all questions in the set using either forward or reverse order for the response options.

Appendix A1, "ANES 2008 Time Series Study Pre-election questions with forward/reverse response options" provides a list of all Pre-election questions included for the forward/reverse assignment.

If the Respondent was re-interviewed for the Post-election survey, the same (forward or reverse) response option order was assigned for a selection of Post-election questions. Appendix A2, "ANES 2008 Time Series Study Post-election questions with forward/reverse response options" provides a list of all Post-election questions included in the set for forward/reverse assignment.

.

Reverse order meant that the order of response options in the question text was reversed, and the order in which response options were listed onscreen for interviewer coding was also reversed.

TYPE:

Numeric

V082402 PreRandom.2. OLD or NEW selection of questions

PRE-ELECTION RANDOMIZATION

Split administration: "OLD" or "NEW" version

·

VALID CODES:

.

- 1. OLD version of selected questions
- 2. NEW version of selected questions

REFERENCE:

Appendix B1.(Pre-election questions with split administration)
Appendix B2. (Post-election questions with split administration)
Post: PostRandom.2. (Post OLD/NEW split administration)

NOTES:

The OLD/NEW split was the 'major' split for the ANES 2008 Time Series Study.

For the Pre-election interview, other splits were: A/B, C/D, E/F, G/H, J/K, M/N, P/Q, and R/S. Appendix B1, "ANES 2008 Time Series Study Pre-election questions with split administration," provides a list of all Pre-election questions having split administration.

If a Respondent was re-interviewed for the Post-election survey, OLD/NEW assignment carried over to a selection of Post-election questions. For Post-election cases, item PostRandom.2 has the same value as PreRandom.2. Appendix B2, "ANES 2008 Time Series Study Post-election questions with split administration," provides a list of all Post-election questions having split administration.

. . . .

For Pre-election issue questions traditionally administered as 7-point scales, with the exception of the aid to blacks (N5-N5c2) scale, Respondents were randomly assigned to either the standard 7-point scale ("OLD" version), or else were assigned to a "NEW" version of branching questions.

For the women's role 7-point scale only, however, while the OLD/NEW version assignment still applied, an alternative set of questions was not administered to the Respondents with NEW assignment in PreRandom.2; questions on the topic of women's role (P7-P7c2) represent only the half-sample of Respondents with OLD version assignment in PreRandom.2.

Assignment to OLD/NEW was the same for all sets of scale/branching alternatives, with the exception of the aid to blacks 7-point scale. All Pre-election Respondents were administered

.

Included for each scale/branching alternative was an issue 'importance' question that was administered differently according to the version assigned. The OLD version of issue importance was the traditional ANES importance question but with response options in reverse order compared to the order used in most recent ANES Time Series studies; the NEW version of the issue importance question used a new set of response options.

the standard 7-point scale on aid to blacks (N5-N5c2).

An exception to this pattern occurred for the aid to blacks 7-point scale (which was administered to all Respondents), where OLD/NEW assignment in PreRandom.2 determined whether the OLD or NEW importance question (N5b1 or N5b2) was administered.

A similar exception also accompanied the question on gun control, which was not a 7-point scale but was followed by split assignment to OLD/NEW 'importance' versions (P6a1 or P6a2) according to PreRandom.2.

. . . .

Additionally, OLD/NEW assignment applied to Pre-election media questions in section A.

Respondents who were assigned to OLD 7-point issue scales were administered the standard media questions Allb-Allel; Respondents assigned to NEW branching questions in place of traditional 7-point issue scales were administered new media questions Al2a-Al2dla.

TYPE:

Numeric

V082403 PreRandom.3. VERSION A or B campaign interest

PRE-ELECTION RANDOMIZATION

Split administration: A or B (campaign interest)

VALID CODES:

- 1. VERSION A (campaign interest) Ala
- 2. VERSION B (campaign interest) Alb

REFERENCE:

Ala. (VERSION A campaign interest)

Alb. (VERSION B campaign interest)

Appendix B1. (Pre-election questions with split administration)

NOTES:

Respondents were randomly assigned to the standard campaign interest question Ala (VERSION A) or to revised campaign interest question Alb (VERSION B).

The A/B version assignment is specific to Pre-election campaign interest questions only (Ala/Alb) and is independent of the major "OLD/NEW" split documented in PreRandom.2.

Appendix B1, "ANES 2008 Time Series Study Pre-election questions with split administration," provides a list of all Pre-election questions having split administration, including all questions in the OLD/NEW split, and splits A/B, C/D, E/F, G/H, J/K, M/N, P/Q, and R/S.

TYPE:

Numeric

V082404 PreRandom.4. Order of Presidential candidate likes-dislikes

vu82404 Prekandom.4. Order of Presidential Candidate likes-dislikes

PRE-ELECTION RANDOMIZATION

Order of Presidential candidates in administration of candidate likes-dislikes questions

VALID CODES:

- 1. Democratic Presidential cand is 1st (likes-dislikes) A8a-d
- 2. Republican Presidential cand is 1st (likes-dislikes) A9a-d

REFERENCE:

A8a. - A8d. (Democratic Pres cand likes-dislikes)

A9a. - A9d. (Republican Pres cand likes-dislikes)

NOTES:

Respondents were randomly assigned to have either the Democratic Presidential candidate 'likes-dislikes' (A8a-d) or the Republican Presidential candidate 'likes-dislikes' (A9a-d) asked first.

TYPE:

Numeric

V082405 PreRandom.5. Order Presidential candidate thermometers

PRE-ELECTION RANDOMIZATION

Order of Presidential candidates in administration of thermometers

VALID CODES:

- 1. Democratic Presidential cand is 1st (thermometer) B1b1
- 2. Republican Presidential cand is 1st (thermometer) ${\tt B1b2}$

REFERENCE:

Blb1. (Democratic Pres cand thermometer)

B1b2. (Republican Pres cand thermometer)

NOTES:

In the Pre-election thermometer series, after the initial thermometer for the President (Bla), thermometers for the 2 major-party Presidential candidates were administered with either the Democratic Presidential candidate thermometer (Blb1) or the Republican Presidential candidate thermometer (Blb2) asked first.

TYPE:

Respondents were randomly assigned to have either the Democratic Presidential candidate job security questions or else the Republican Presidential candidate job security questions asked first.

. . . .

Job security questions were asked OLD 7-point scales N4cl and N4c2 (for guaranteed jobs and income versus individual initiative), or else in NEW branching questions N4hl-N4hla and N4h2-N4h2a (for allowing a citizenship process for illegal aliens). The OLD/NEW split is documented in PreRandom.2.

B1. INTRO THERM PRE

PRE-ELECTION SURVEY

Please look at page 3 of the booklet.

I'd like to get your feelings toward some of our political leaders and other people who are in the news these days. I'll read the name of a person and I'd like you to rate that person using something we call the feeling thermometer. Ratings between 50 degrees and 100 degrees mean that you feel

favorable and warm toward the person. Ratings between 0 degrees and 50 degrees mean that you don't feel favorable toward the person and that you don't care too much for that person. You would rate the person at the 50 degree mark if you don't feel particularly warm or cold toward the person.

If we come to a person whose name you don't recognize, you don't need to rate that person. Just tell me and we'll move on to the next one.

V083036 Bla. Feeling Thermometer: President

V083094a G2a. [VERSION P] Which party better: keeping out of war ______

PRE-ELECTION SURVEY

IF R SELECTED FOR PARTY-PERFORMANCE ON WAR VERSION P:

Looking ahead, do you think the problem of KEEPING OUT OF WAR would be handled better in the next four years by [the DEMOCRATS, the REPUBLICANS / the REPUBLICANS, the DEMOCRATS], or ABOUT THE SAME by both?

INTERVIEWER INSTRUCTION:

{IF 'DK' OR 'NEITHER PARTY' IS VOLUNTEERED, DO NOT PROBE}

VALID CODES:

- 1. Democrats
- 3. Republicans
- 5. About the same by both
- 7. Neither party {VOL}

MISSING CODES:

- -1. INAP, R selected for VERSION Q
- -8. Don't know
- -9. Refused

REFERENCE:

PreRandom.18. (order of parties in text of party performance)
PreRandom.19. (VERSION P/Q party war performance)
Appendix B1. (Pre-election questions with split administration)

NOTES:

The order of the major parties in the question text of party performance items G1 and G2a/G2b was randomized, as documented in PreRandom.18.

. . . .

Respondents were randomly assigned to the standard war question G2a (VERSION P) or to new war question G2b (VERSION Q), as documented in PreRandom.19.

The P/Q version assignment is specific to Pre-election party war-performance questions only (G2a or G2b) and is independent of the major "OLD/NEW" split documented in PreRandom.2.

```
NOTES:
-----
Respon
```

Respondents were randomly assigned to standard-version traits questions (VERSION J), or else to new-version traits questions (VERSION K), as documented in PreRandom.21. For the 2 major party Presidential candidates, VERSION J traits are Klal-Kla7 and K2al-K2a7; VERSION K traits are Klbl-Klb7 and K2bl-K2b7.

The J/K version assignment is specific to Pre-election traits questions only, and is independent of the major "OLD/NEW" split documented in PreRandom.2.

.

Either the traits for the Democratic Presidential candidate or the traits for the Republican Presidential candidates were administered first according to random assignment, as documented in PreRandom.22.

. . . .

Question wording differed slightly for the 1st administered trait. The order in which 7 specific traits were administered was randomized, as documented in PreRandom.23a-PreRandom.23g. The order of traits was the same for the Presidential candidates and for the President (R2a1-R2a7/R2b1-R2b7).

.

This question was included in the selection of Pre-election questions for which Respondents were randomly assigned to response options in either forward or reverse order, as documented in PreRandom.1.

.

If R was selected for VERSION J traits and was also assigned to forward order of response options, then the Respondent Booklet reference was to Page 6; if R was selected for VERSION J traits and was assigned to reverse-order response options, then the RB reference was to Page 7.

PreRandom.22. (order of Pres cands - traits)

PreRandom. 23d. (order of trait KNOWLEDGEABLE)

PreRandom.1. (forward/reverse response options)

NOTES:

Respondents were randomly assigned to standard-version traits questions (VERSION J), or else to new-version traits questions (VERSION K), as documented in PreRandom.21. For the 2 major party Presidential candidates, VERSION J traits are Kla1-Kla7 and K2a1-K2a7; VERSION K traits are K1b1-K1b7 and K2b1-K2b7.

The J/K version assignment is specific to Pre-election traits questions only, and is independent of the major "OLD/NEW" split documented in PreRandom.2.

Either the traits for the Democratic Presidential candidate or the traits for the Republican Presidential candidates were administered first according to random assignment, as documented in PreRandom.22.

Ouestion wording differed slightly for the 1st administered trait. The order in which 7 specific traits were administered was randomized, as documented in PreRandom.23a-PreRandom.23q. The order of traits was the same for the Presidential candidates and for the President (R2a1-R2a7/R2b1-R2b7).

This question was included in the selection of Pre-election questions for which Respondents were randomly assigned to response options in either forward or reverse order, as documented in PreRandom.1.

If R was selected for VERSION J traits and was also assigned to forward order of response options, then the Respondent Booklet reference was to Page 6; if R was selected for VERSION J traits and was assigned to reverse-order response options, then the RB reference was to Page 7.

VERSION K traits were administered without use of a Respondent Booklet.

.

Respondents were randomly assigned to standard-version traits questions (VERSION J), or else to new-version traits questions (VERSION K), as documented in PreRandom.21. For the 2 major party Presidential candidates, VERSION J traits are Klal-Kla7 and K2al-K2a7; VERSION K traits are Klbl-Klb7 and K2bl-K2b7.

The J/K version assignment is specific to Pre-election traits questions only, and is independent of the major "OLD/NEW" split documented in PreRandom.2.

.

Either the traits for the Democratic Presidential candidate or the traits for the Republican Presidential candidates were administered first according to random assignment, as documented in PreRandom.22.

.

Question wording differed slightly for the 1st administered trait. The order in which 7 specific traits were administered was randomized, as documented in PreRandom.23a-PreRandom.23g. The order of traits was the same for the Presidential candidates and for the President (R2a1-R2a7/R2b1-R2b7).

. . . .

This question was included in the selection of Pre-election questions for which Respondents were randomly assigned to response options in either forward or reverse order, as documented in PreRandom.1.

N3. INTRO GOVT HEALTH INSURANCE SCALE ______

PRE-ELECTION SURVEY

IF R SELECTED FOR HEALTH INSURANCE QUESTIONS VERSION "OLD":

Please look at page 10 of the booklet.

There is much concern about the rapid rise in medical and hospital costs. Some people feel there should be a government insurance plan which would cover all medical and hospital expenses for everyone. Suppose these people are at one end of a scale, at point 1.

Others feel that all medical expenses should be paid by individuals through private insurance plans like Blue Cross or other company paid plans. Suppose these people are at the other

And, of course, some other people have opinions somewhere in between, at points 2, 3, 4, 5, or 6.

N5. INTRO AID TO BLACKS

PRE-ELECTION SURVEY

Please look at page 12 of the booklet.

Some people feel that the government in Washington should make every effort to improve the social and economic position of blacks. (Suppose these people are at one end of a scale, at point 1.)

Others feel that the government should not make any special effort to help blacks because they should help themselves. (Suppose these people are at the other end, at point 7.) And, of course, some other people have opinions somewhere in between, at points 2, 3, 4, 5, or 6.

V083137 N5a. Govt assistance to blacks scale: self-placement

P4. INTRO ENVIRONMENT/JOBS TRADEOFF

F4. INTRO ENVIRONMENT/OODS TRADEOFF

PRE-ELECTION SURVEY

IF R SELECTED FOR ENVIRONMENT QUESTIONS VERSION "OLD":

Please look at page 14 of the booklet.

Some people think it is important to protect the environment even if it costs some jobs or otherwise reduces our standard of living. (Suppose these people are at one end of the scale, at point number 1).

Other people think that protecting the environment is not as important as maintaining jobs and our standard of living. (Suppose these people are at the other end of the scale, at point number 7.

And of course, some other people have opinions somewhere in between, at points 2, 3, 4, 5, or 6).

______
     P7. INTRO WOMEN'S ROLE
______
PRE-ELECTION SURVEY
IF R SELECTED FOR WOMEN'S ROLE OUESTIONS VERSION "OLD" (ONLY):
Please look at page 15 of the booklet.
Recently there has been a lot of talk about women's rights.
Some people feel that women should have an equal role with
men in running business, industry, and government. (Suppose
these people are at one end of a scale, at point 1.)
Others feel that a woman's place is in the home. (Suppose
these people are at the other end, at point 7.)
And, of course, some other people have opinions somewhere in
between, at points 2, 3, 4, 5 or 6.
```

INTERVIEWER INSTRUCTION:

{DO NOT PROBE DON'T KNOW}

```
REFERENCE:
PreRandom.20. (VERSION J/K traits)
Appendix B1. (Pre-election questions with split administration)
PreRandom.23f. (order of trait HONEST)
PreRandom.1. (forward/reverse response options)
NOTES:
VERSION K traits were administered without use of a
Respondent Booklet.
. . . . .
Respondents were randomly assigned to standard-version
traits questions (VERSION J), or else to new-version
traits questions (VERSION K), as documented in PreRandom.21.
For the President, VERSION J traits are R2a1-R2a7, and
VERSION K traits are R2b1-R2b7.
The J/K version assignment is specific to Pre-election
traits questions only, and is independent of the major
"OLD/NEW" split documented in PreRandom.2.
Question wording differed slightly for the 1st administered
trait. The order in which 7 specific traits were administered
was randomized, as documented in PreRandom.23a-PreRandom.23g.
The order of traits was the same for both Presidential
candidates (Kla1-Kla7, K2a1-K2a7) and for the President.
This question was included in the selection of Pre-election
questions for which Respondents were randomly assigned to
response options in either forward or reverse order, as
documented in PreRandom 1.

60. PERMANENTLY DISABLED, not working
entire Respondent employment/occupation module (Y7a-Y16k),
see Y6x1 and Y6x2.
                                                                           61. PERM. DISABLED and working now, working <20 hours/wk
                                                                           70. HOMEMAKER, no other occupation
The traditional set of 'stacked' occupation variables are
                                                                           71. HOMEMAKER and working now, working <20 hours/wk
found in Y16x1-Y16xx11.
                                                                           75. HOMEMAKER and student, no other occupation
                                                                           80. STUDENT, no other occupation
                                                                           81. STUDENT and working now, working <20 hours/wk
Y6 represents the initial employment status given by the
Respondent to begin the employment-occupation series; it
precedes additional questions in the Respondent employment/
                                                                           MISSING CODES:
occupation module which may provide further information about
                                                                           _____
the Respondent's complete employment status.
                                                                           -8. Don't know
                                                                           -9. Refused
For Respondents with multiple mentions at the start of
the employment series:
5 and 1,2,4,6,7,8 = Y6 initial status Retired
                                                                           REFERENCE:
4 and 6,7,8
               = Y6 initial status Unemployed
                  (codes 1,2 not allowed with 4)
                                                                           Y6x2. (SUMMARY: R employment status 1-digit)
6 and 1,2,7,8 = Y6 initial status Disabled
7 and 1,2,8 = Y6 initial status Homemaker
                                                                           NOTES:
8 and 1,2
              = Y6 initial status Student
Codes 1 and 2 were not allowed to be coded in combination.
                                                                           This variable summarizes all data from the entire Respondent
                                                                           employment module (Y7a-Y16k).
Respondents with Y6 initial employment status 1 or 2
                                                                           Y6x2 is a collapsed version of this variable.
(Working Now or Temporarily Laid Off) proceed directly to
questions on current occupation in Y16a-Y16k.
                                                                           The traditional set of 'stacked' occupation variables are
                                                                           found in Y16x1-Y16xx11.
For Respondents with an initial employment status in Y6
which is not 1 or 2, the employment/occupation series
                                                                           TYPE:
continues by asking about past or recent occupation and,
                                                                           ____
if initial employment status is not 4 (Unemployed), asking
                                                                           Numeric
specifically whether the Respondent is currently working or
not; when the answer to the latter question is yes (R is
currently working), then the Y16a-Y16k questions on current
occupation are administered too.

V083243a Y16x1. SUMMARY: R OCCUPATION IDENTIFIED - PAST/PRESENT

PRE-ELECTION SURVEY

SUMMARY:

R OCCUPATION IDENTIFIED IN EMPLOYMENT SERIES Y16a-Y16k- PAST/PRESENT

VALID CODES:

- 0. Neither current nor past occupation identified (no occupation: 5,-8,-9 in Y9/Y7b or DK/RF in Y6 initial employment status)
- 1. Current occupation only (Y16a-Y16k)
- 2. Past occupation only (Y10a-Y10e)
- 3. Both current and past occupations

REFERENCE:

Y6. (Initial employment status)

NOTES:

This describes whether the Respondent's current occupation or past occupation was described in the employment/occupation module Y6-Y16k.

. . . .

For Respondents whose Y6 initial employment status was not Working Now or Temporarily Laid Off (1 or 2), questions about past occupation were asked first; if it was subsequently determined that R was currently working, then questions about current occupation were asked too.

Respondents with Y6 initial employment status Working Now or

Respondents with Y6 initial employment status Working Now or Temporarily Laid Off were asked only about current occupation.

TYPE:

Numeric

V083243b Y16x2. SUMMARY: STACKED OCCUPATION PAST OR PRESENT

PRE-ELECTION SURVEY

SUMMARY:

STACKED OCCUPATION PAST OR PRESENT

VALID CODES:

- 0. No occupation represented in stacked items Y16xx1-Y16xx8
- 1. Current occupation in stacked items Y16xx1-Y16xx8
- 2. Past occupation in stacked items Y16xx1-Y16xx8

NOTES:

This describes whether the Respondent's current occupation or past occupation is represented in the traditional stacked items Y16xx1-Y16xx8.

.

Current occupation is represented in Y16xx1-Y16xx8 for the following Respondents:

- initial employment status Y6 is Working Now or Temporarily Laid Off (1 or 2)
- initial employment status Y6 is Disabled (6) and R is

presently working (in Y13a)

- initial employment status Y6 is Homemaker or Student (6 or 7) and R is presently working (in Y7a)

Past occupation is represented in Y16xx1-Y16xx8 for the following Respondents:

- initial employment status Y6 is Unemployed (4) and R has ever worked (in Y9)
- initial employment status Y6 is Retired (5), whether R is presently working or not (in Y13a)
- initial employment status Y6 is Disabled (6) and R is not presently working (in Y13a) but has ever worked (in Y9)

Nonworking homemakers or students (7 or 8 in Y6) who have recently worked (in Y7b) do not have past (recent) occupation represented in Y16xx1-Y16xx9.
